The learning objectives for the workshop are as follows:

After participating in the workshop, attendees will be able to:

1. explain to others the importance and benefits of becoming a primary stroke center.
2. identify the steps needed to be taken in their hospitals to become a primary stroke center, based upon the recommendations from the Brain Attack Coalition.
3. incorporate recommended acute stroke treatment and secondary prevention interventions into their hospital setting.
4. address potential barriers that may be encountered in becoming a primary stroke center.

Supported by an unrestricted educational grant from AstraZeneca
